

# Modelling Handedness as a Function of Cooperation and Competition

Or: How I Learned to Bow Down to My Left-Handed Overlords

Meridith Bartley   John Ensley

Department of Statistics  
The Pennsylvania State University

STAT 590 Presentation, December 4, 2014

# Outline

## Introduction

History of Handedness

## Building the Model

## Comparing Model to Baseball Data

Another Subsection

## History of Handedness

- ▶ 10% of population is left-handed.
- ▶ Why hasn't this percentage reached equilibrium in populations at either:
  - ▶ 50%-50% between left and right-handedness
  - ▶ 100% either left or right handed
  - ▶ Some other handedness ratio
- ▶ This paper proposes that hand preference may be influenced by costs and benefits of cooperation and competition during human evolution.

# Blocks

## Block Title

You can also highlight sections of your presentation in a block, with it's own title

## Theorem

*There are separate environments for theorems, examples, definitions and proofs.*

## Example

Here is an example of an example block.

# Summary

- ▶ The **first main message** of your talk in one or two lines.
- ▶ The **second main message** of your talk in one or two lines.
- ▶ Perhaps a **third message**, but not more than that.
- ▶ Outlook
  - ▶ Something you haven't solved.
  - ▶ Something else you haven't solved.
